

# Ceramic Series

Zirconia ceramic blades are super sharp and stay that way for longer! They will not corrode and in use will prevent the discolouration and tainting of food. The technology used in the manufacture of our ceramic knives ensures that the zirconia blade core is extremely compact and strong. This helps to give the blade a longer life and superior flexural strength.

- **The sharpest ceramic knife we have ever produced**
- **Includes a sheath to protect the blade when not in use**
- **Counterbalanced, silicone moulded handle**
- **Super strong blade with a superior flexural strength**
